RESEARCH TEAMING WITH MARSHMALLOWS

Defining and Assigning Roles for Project Success:

- Leader
- Motivator
- Time and Task Manager
- Mediator
- Translator (across disciplines)
- Integrator
- Relater (good social skills)
- Reflector (on the team process—what is working, what is not)

Questions To Consider For Interdisciplinary Research Teaming:

- What makes a good research team?
- What are good examples of group communication?
- How did you define roles within your team?
- How did the constraints/disruptions of this activity affect your team and ability to accomplish your goal?
- What rewards/awards (other than tenure and promotion) could motivate researchers to participate in IDR?
